

# The DEKRA Modular Test Programme

Select the test option which best suits your business

At DEKRA Certification we provide both flexibility and efficiency in testing. You can select what tests you do in-house and which you contract out to us. The DEKRA Modular Test Programme clearly defines the options for each aspect of the testing programme. At the conclusion of the programme, assuming all tests are passed and the test report is finalized, we will issue the relevant certificates.

## Option A

Full testing in our test laboratories

### You save costs

No need for specialised testing personnel.

### You save space

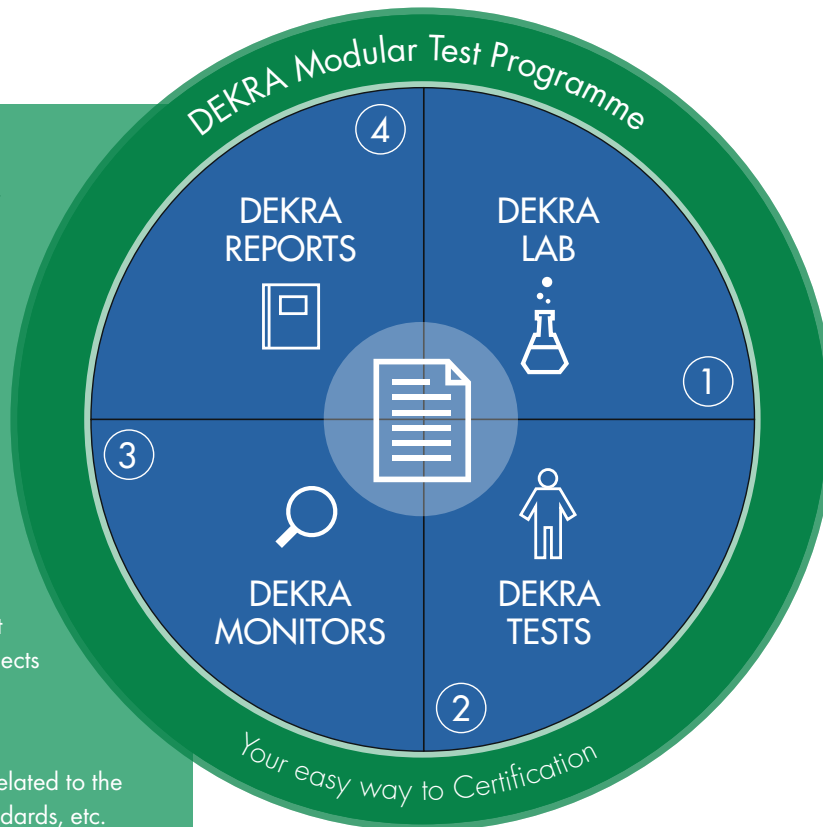

No need for a test laboratory.

### You save time

Your personnel does not need to prepare test objects or attend all tests.

### You save effort

We handle everything related to the tests, qualifications, standards, etc.

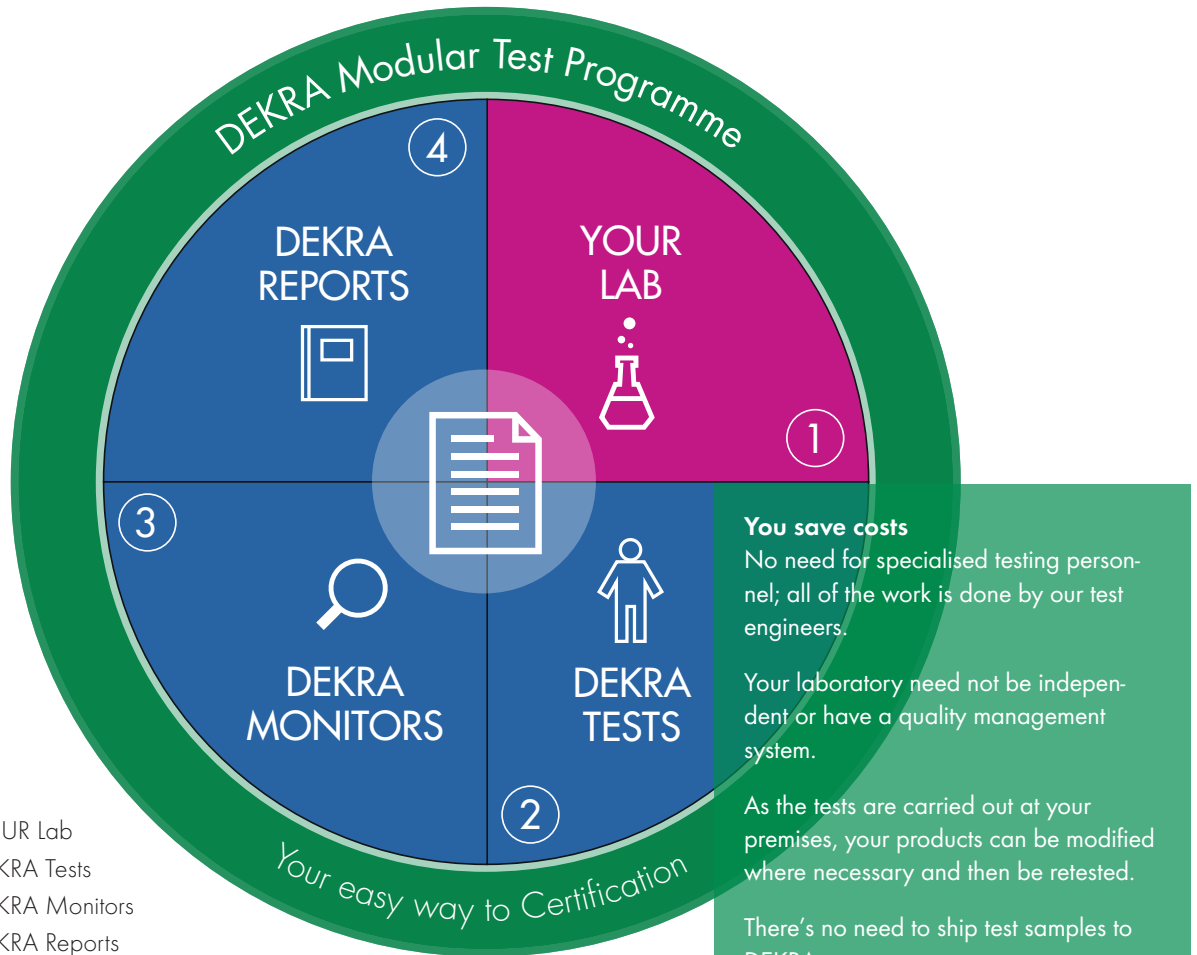

YOU  
CHOOSE

Option B

# Testing at Manufacturers Premises (TMP)

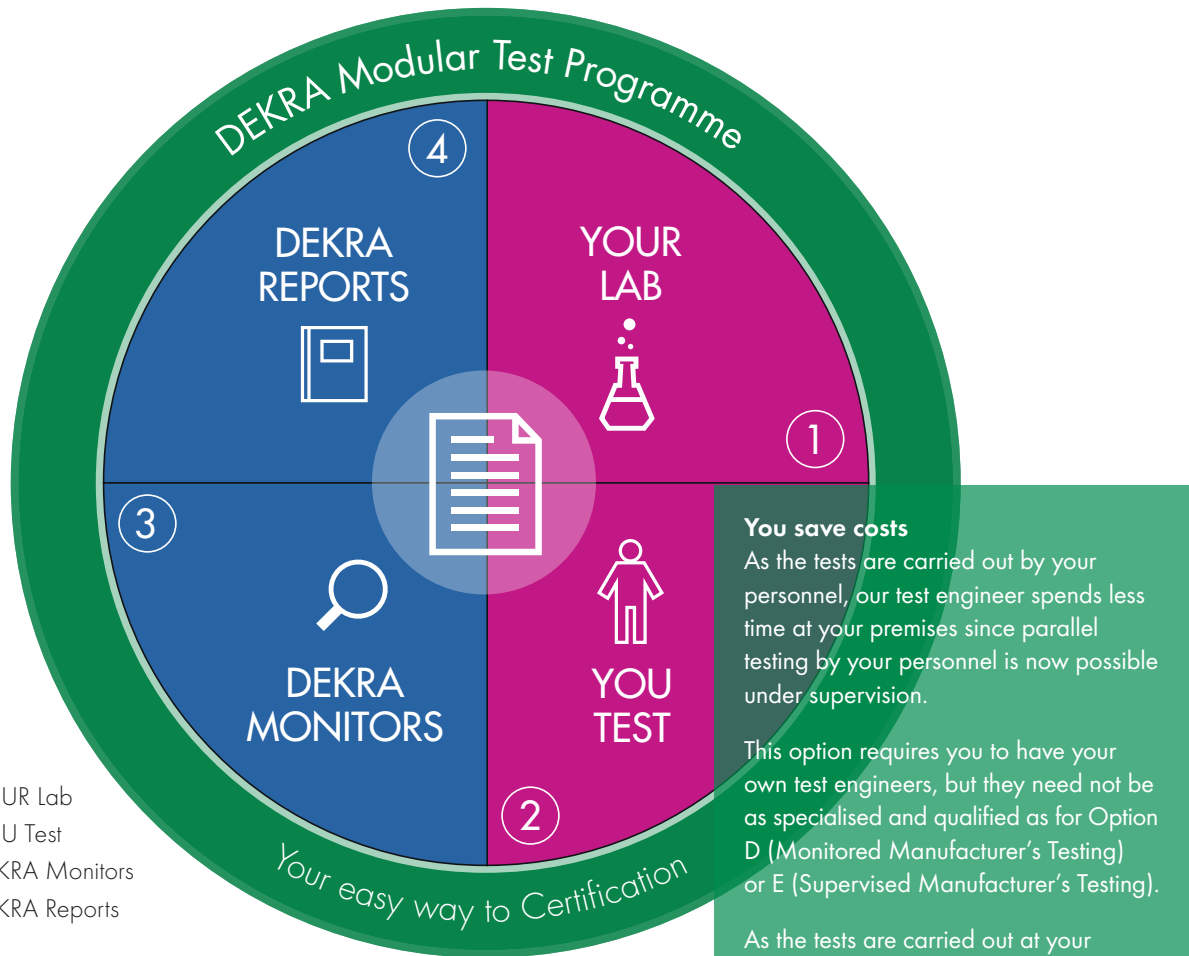

...You can also choose  
Witnessed Manufacturer's  
Testing

## Option C

# Witnessed Manufacturer's Testing (WMT)

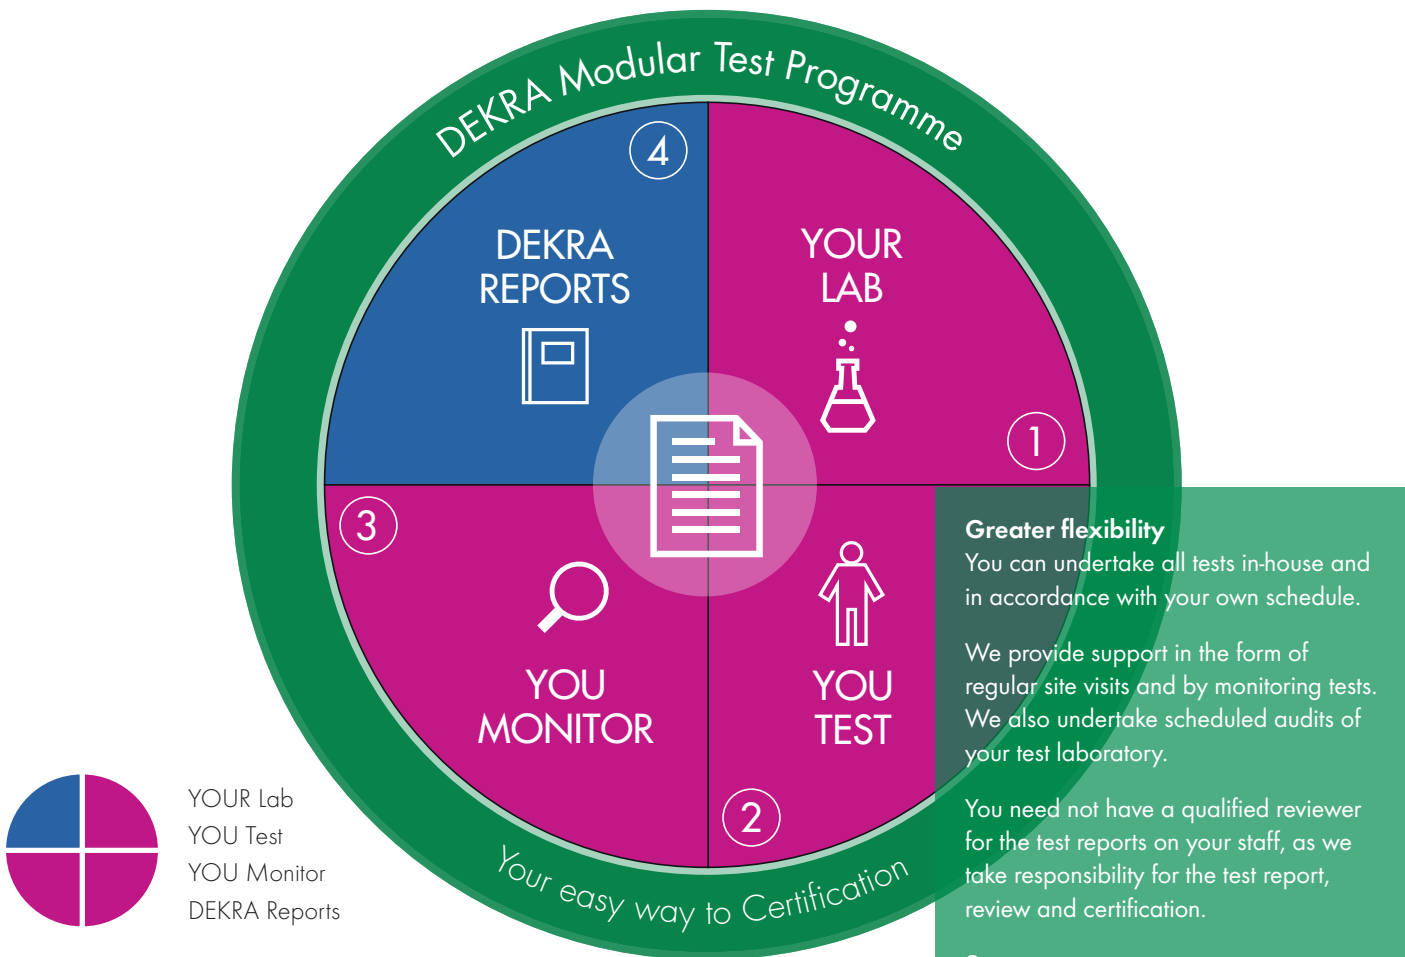

...Another option is  
Monitored Manufacturer's  
Testing

## Option D

# Monitored Manufacturer's Testing

### Laboratory audit to ISO 17025

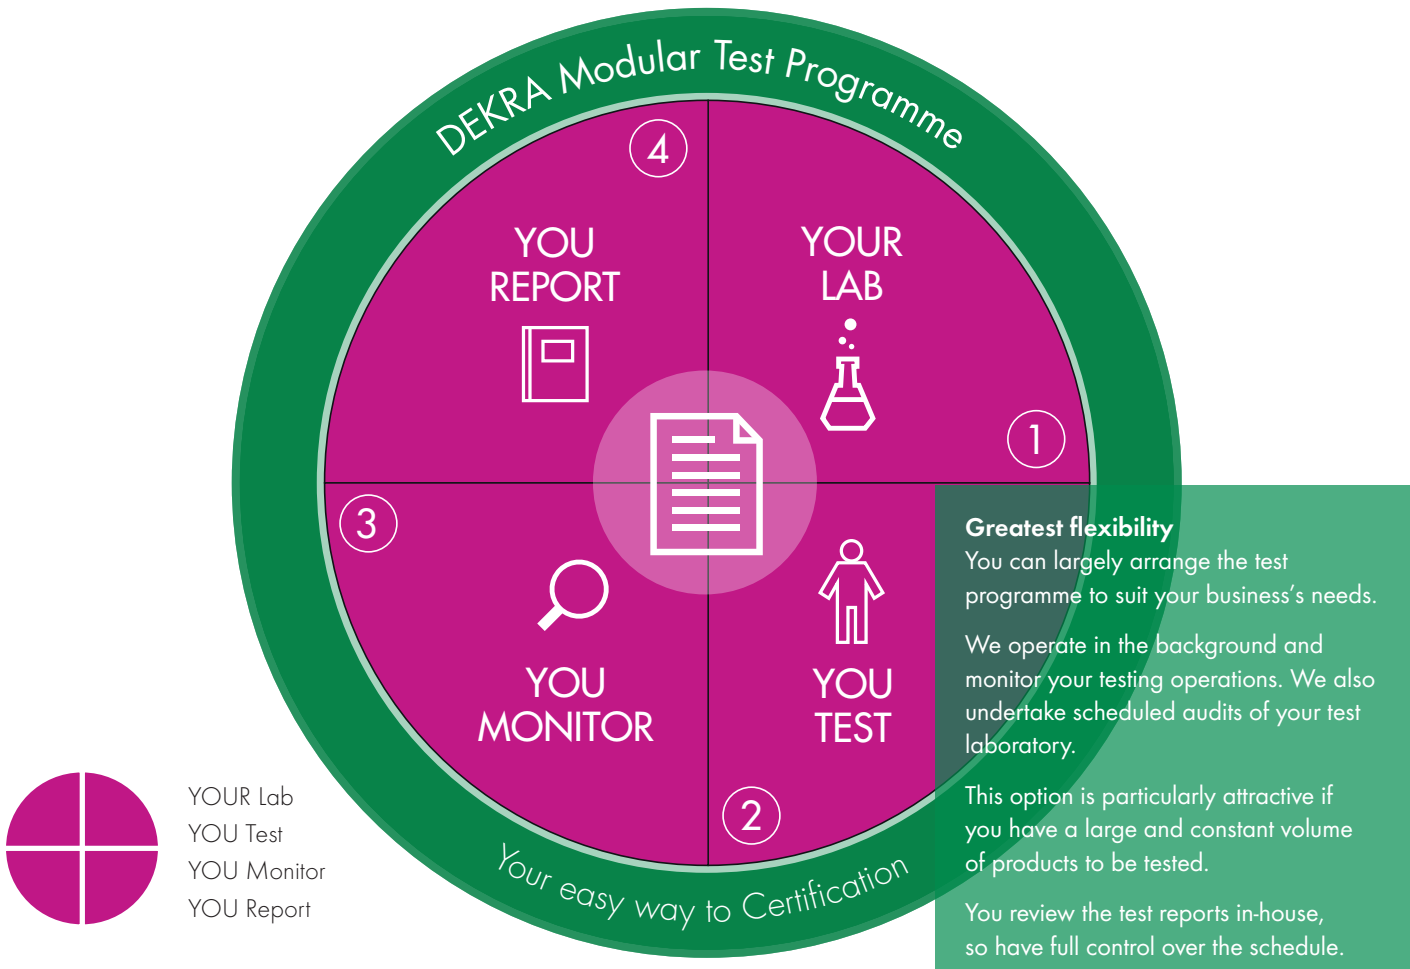

The laboratory audit is a separate DEKRA service based on ISO standard 17025 (General requirements for the competence of testing and calibration laboratories) to verify that your laboratory operates an effective quality management system. The audit demonstrates the quality status of your laboratory and whether it is capable of carrying out Option D testing (Monitored Manufacturer's Testing) or Option E testing (Supervised Manufacturer's Testing).

...A final option is  
Supervised Manufacturer's  
Testing

## Option E

# Supervised Manufacturing Testing (SMT\*)

### Laboratory audit to ISO 17025

The laboratory audit is a separate DEKRA service based on ISO standard 17025 (General requirements for the competence of testing and calibration laboratories) to verify that your laboratory operates an effective quality management system. The audit demonstrates the quality status of your laboratory and whether it is capable of carrying out Option D testing (Monitored Manufacturer's Testing) or Option E testing (Supervised Manufacturer's Testing).

\*SMT is not permitted for certain certification schemes

# Choose the test option which best suits your business:

Requirements for Manufacturer's Testing laboratory (MTL) or Customer Testing Facility (CTF)	Full testing at DEKRA	Testing at Manufacturer's Premises (TMP)	Witnessed Manufacturer's Testing (WMT)	Monitored Manufacturer's Testing (MMT)	Supervised Manufacturer's Testing (SMT)
<b>Test facilities</b>					
Controlled laboratory climate (free from external influence)	✓	✓	✓	✓	✓
Stabilized power supply (voltage, frequency, harmonic distortion)	✓	✓	✓	✓	✓
Calibrated testing equipment*	✓	✓	✓	✓	✓
Application of measurement uncertainty concepts	✓		✓	✓	✓
<b>Personnel</b>					
Testing by qualified DEKRA engineers	✓	✓			
The laboratory and its personnel must be independent and impartial	✓		✓	✓	✓
Testing by qualified manufacturer's engineers	✓		✓	✓	✓
Compilation of test reports	✓				✓
Qualified reviewers for checking/reviewing test projects	✓				✓
<b>Quality system requirements</b>					
Laboratory partially compliant with ISO 17025	✓	✓	✓		
Quality Management System (QMS)	✓			✓	✓
Laboratory fully compliant with ISO 17025	✓			✓	✓
Participate in proficiency testing programmes	✓			✓	✓
<b>Witnessing and Monitoring</b>					
100% witnessed by a DEKRA engineer	✓		✓		
Partially witnessed by a DEKRA engineer	✓			✓	✓
Certification issued by DEKRA	✓	✓	✓	✓	✓
* DEKRA engineer brings necessary testing equipment (in case not all equipment calibrated and available)					
** Subject to change
